Eli Cooper, Manager of the Ann Arbor Systems Planning Group; Introduced by **John Dahl**. Eli Cooper has been with the city of Ann Arbor since 2005. He previously worked in Seattle and he holds a Master's degree in Urban Planning from Hunter College at the City University of New York. His topic today was the recent 18 month review of the Non-Motorized Transportation Plan for Ann Arbor. The word "Non-Motorized" is used because the plan includes information on both biking and walking in the city. Ann Arbor has an unusually high percentage of people who walk to work, six times the national average. He will be reporting this week to the City Planning Commission regarding this review of the transportation plan. He gave information on the growth of bike lanes and shared-ride lanes over the last five years. He also discussed the rationale for changes from four lane roads to three lane roads with bike lanes and pedestrian islands. Current challenges include maintenance of bike lanes and identifying sidewalk gaps that need to be completed. The city will create bicycle-sharing stations next spring. Most will be located downtown and in the campus area.
